16.15.02 Release Notes

Type	Category	Hot Key	Subject	Resolution	Ticket
Feature	Integration - API	N-A	API Workflow Documentation	Updated documentation is available for the API workflow with details on all the available services.	54450
Feature	Integration - API	N-A-2	Need new inboundAPI to update Item FG (Specifically need dimensions and stack height	The API Inbound Module now includes a 'updateItem' API call. This call allows for updating the FG Item Stack Height and Pallet L, W, H dimensions.	61020
Feature	Integration - API	N-A-2	API Inbound cXMLOrder - workflow does not recognize NK1-OEAutoApproval	All inbound API calls to the cXML order will now be processed using the N-K-1 = OEAutoApproval settings.	61347
Feature	Integration - API	N-A-4	API Inbound and Outbound Consoles - add email configuration alerts for Success and Failure status	A new Dynamic AOA report has been created that allows the user to track the Success, Failures or ALL API Inbound Event transactions.	61364
Feature	Integration - API	N-A-4	API Inbound - Add option to 'resubmit' an existing record	<p>The API Inbound Tester now has the ability to resubmit a Failed transaction.</p> <p>If the data issue related to the failure is corrected, the process will complete, but if the same issue or another issue that prevents passing is encountered, the inbound API screen will display a second response indicating the problem.</p> <p>The process of correcting the data can continue until the process can be completed successfully.</p>	61513
Feature	Integration - API	N-A-6	API Monitor - remove requirement to enter a Password to stop a process	<p>Removed the need to enter a password to start or stop the node service used for the API module since it may be started by a user that is not available to stop or restart the service.</p> <p>It is assumed that anyone with direct access to the server is able to start and stop the service.</p>	61579
Feature	Job Costing	JU1	JU1 Mass Delete Function	The system now allows for the mass deletion of materials and routing records on any job.	60172
Feature	Order Entry	O-B-!	OBI- Integer Value Not Supported	The system now supports invoice numbers up to 9,999,999	61775
Feature	Order Entry	O-Q-1	Speed - When utilizing the order inquiry browse in (O-Q-1) if a user has all blanks the speed is extremely slow	Improved index for searching in O-Q-1 if fields are left blank.	61015
Feature	Order Entry	O-S-1	O-S-1 Export to Excel Report	The export of BOL data using O-S-1 now includes a column for posted which will export either 'Posted' or 'Unposted' upon export.	60802
Feature	Order Entry	O-S-3	Print Freight Bill / Logo BOL Form	The NK1 = BOLFmtX format BOLFmtx15 will now allow the user to print the Freight Bill with the option to suppress the customer name and only print the ship to address on the form.	60804
Feature	Order Shipping	O-S-1 O-S-3 O-S-4	BOL Posting - Allow a date for BOL and invoice to be in a certain period	New option for NK1 = InvDate to allow the user to use the posting date (Which is prompted for in all Post BOL areas) as the invoice date to match invoice date to the date it was actually created.	60935
Feature	Purchasing	P-U-1	Send Purchase Order: Add the field : PO QTY RECEIVED	The Outbound API SendPurchaseOrder now allows for the sending of total received quantity as part of the response data.	61580

Feature	System Settings/Global	A-C-1 A-C-2 A-Q-2 A-Q-4	Regression Test - Invoice # greater than 99999 - Part 3	All programs have been enhanced to handle invoice numbers in excess of 1mm.	61911
Defect	Accounting - AP	V-R-#	Error - Exporting Check Register from Advantzware	When selecting the Excel Export option on the AP Check Register, you may have received the following error message: Sorry, we couldn't find ?.xlsx. Is it possible it was moved, renamed or deleted?. This has been corrected.	61087
Defect	Accounting - AR	O-B-4	OB4- Integer Value Not Supported	Corrected defect where the out of balance amount displayed shows question marks. The out of balance situation can occur when the invoice is not balanced but more likely when attempting to post a single invoice that is part of a consolidated invoice.	61815
Defect	Estimating	E-C	Changing Combo/Tandem to Set does not copy Enhanced Packing and Layer/Divider to Form 0	When copying a set estimate all enhanced materials will now copy to new estimate.	61312
Defect	Estimating	E-C	Corrugated Estimating Layout tab - materials entered on BOL program do not have costs calculated	On a corrugated estimate if you are using the BOM program on the Layout tab to add materials to the estimate, costs may not have been calculated for these additional materials. This has been corrected.	61702
Defect	Estimating - New	E-C	CEVersion=New - Freight Cost per MSF for Sets incorrect	Corrected freight cost per MSF for sets when using the N-K-1 = CEVersion when set to 'New' for the character value.	58994
Defect	Estimating - New	E-F	N-K-1 CeVersion New Combo Estimate 13772 Costs show ???	New estimating was giving an error if there was no pallet defined. This has been corrected.	60165
Defect	Integration - API	N-A-2	API Inbound cXMLOrder - workflow does not populate all expected fields on order header	Corrected inbound API process to create order such that CSR, Entered by and Last updated by user id values are correctly populated.	61349
Defect	Integration - API	N-A-4	JSON/XML tester - Changing the drop down does not refresh properly	Corrected a defect that would not properly filter the API options when selecting JSON or XML format in the API Inbound Tester.	61980
Defect	Integration - API	N-A-4	API Inbound Events Viewer out of range error in browse	Corrected a defect related to a large number of records in the viewer presenting an error when the list was empty or contained a large quantity of items.	61995
Defect	Integration - API	N-A-4 N-A-3	SendPurchaseOrder/GetPurchaseOrder error parsing JSON when decimal value in response is a fraction between 0 and 1	Corrected a defect where the quantity would not return properly if the quantity had a decimal value in the response.	61999
Defect	Inventory - RM	NM	Warehouse Transaction Report	Corrected the raw material importer to allow for purchased unit of measure as well as consumption unit of measure.	60964
Defect	Job Costing	J-U-5	CorrTrim Problem	The Job Costing CorrTrim Download Program has been modified to now send the Gross Sheet Width and Length.	59748
Defect	Order Entry	O-U-1	"Item in Use" Error	If a user is in Order Entry and they print a job ticket, and then close the job ticket but leave the Job Ticket Print Selection program open, another user may then receive a 'item in use by...' record lock error. This has been corrected in the versions of custom job tickets that had this issue.	56929
Defect	Order Entry	O-U-1	Error deleting 'W' Order - ** No OE Order Master record is available. (91)	Corrected the logic to allow orders submitted from the web or API to be deleted and delete all related lines of the order and log these deletions in the Audit history.	61848
Defect	Order Entry	O-U-7	Load tag print not registering in history	When generating Load Tags via the Loadtag Creation program, not all tags would be displayed in the FG Item History. This has been corrected.	61384

Defect	Order Entry	O-U-7	Loadtag Creation - Sessions Being Ended	Corrected the defect when leaving load tag printing, if running the auto logout procedure, the user will no longer be disconnected from the system database.	61974
Defect	Order Invoicing	O-S-1	problem with BOL screen when entering POs	Corrected an issue when using I-U-1 and entering a purchase order number and depending on screen resolution, the screen would occasionally display a screen outside the frame. This has been corrected.	61845
Defect	Purchasing	P-R-3	PR3 REPORT	Corrected report issue with print PO lines multiple times if the PO has multiple PO lines on it.	59460
Defect	Reports - Classic	H-R-5	HR5- To Email Not Attaching Correct File	Corrected report when running to email to email the correct file if the report is run multiple times.	61738
Defect	Schedule Board	S-3	Schedule Board Production Date incorrect when No Order exists for a Job	Corrected the production date when no order or job exists and the query is run to get new records.	61373
Defect	System Settings/Global	Global	Cue cards reappearing sporadically	On occasion the Cue Cards may start showing up even if a user has selected to not display them. This has been corrected. It was caused by having Que cards turned off you one user and that user changed the setting for another using to turn them on and the system turned them on for the user making the change.	54510
Defect	System Settings/Global	M-F-1 M-F-2	ImportItem - UOM fields not importing to correct fields	Added the unit of measure fields to the raw material export and import programs.	61313
Defect	Touch Screen	T-D	Touch Screen Numeric Pad	Corrected a defect where the number pad would remain on top of other screens when viewing the job jacket from within touch screen.	61037
