16.5.0 Release Notes

Hot Key or Application	Ticket Id	Subject	Resolution	Classifications
A-F-1 AF1	20765	Salesman to Sales Rep	The 'Salesman' field label has been updated to 'Sales Rep' in the following places: View Customer folder, Ship-To folder, Excel Button Salesman column and Excel Button Salesman Name column.	Defect
AOA-R	20608	AOA Parameter Date Expansion Range	The reports in the AOA module have the option of selecting date parameters of Current Date up to (+) / or less than (-) than 6 days. This parameter has been expended to now be able to select Current Date up to (+) / or less than (-) 10 days.	Feature
C-E CE	20329	N-K SETPRINT=ASI - Estimating freight for assembled partition is not picking up cost correctly	When calculating freight on a multi-part assembled estimate, and the NK1 - SETPRINT parameter was set to 'ASI', only the first part may have been included in the Freight calculation. This has been corrected to now include all parts in the freight calculation.	Problem
C-E CE	20885	Viewing an estimate, where there are multiple quantities appended	When viewing estimates, where there are multiple entries of the same quantities appended, a fix was made so that the oldest calculations will be displayed first and then will be sorted by quantity then time.	Defect
D-R-14 DR14	20772	DR14 - Add New Columns - Cust#, Name, Price, UOM and Sales Value	Four new fields have been added to the 'WIP Standards Detail' (D-R-14) report: Customer #, Customer Name, Price, UOM and Sales Value to DR14. Price and UOM are obtained from the Order Line, if available, if not then it is pulled from the Item FG.	Feature
E-B-1 EB1	17756	Expanded options for Box Limits on Machine File	New limits were added to the Machine Limits File. The Definitions of the above are as follows: - Box Width - The Inside Box Width also known as the Width on the Spec Tab - Box Length = The Inside Box Length also known as the Length on the Spec Tab - Box L+W = The Inside Box Length + Inside Box Width - Slot Size = The Size of the 1s Panel running front to back on the machine. i.e. The 1st panel of the Blank Width. For RSC, this would be .5 Width Panel - Slot/Score = The Total of the 1s Panel and 2nd Panel running front to back on the machine. i.e. The Total of the 1st two panels of the Blank Width. For RSC, this would be .5 Width + Depth Panel - Panel (Hd-Hd) = Head to Head Panel Size is any panel from side to side on the machine, except the joint panel. i.e. The blank Length panels across the machine. For RSC, this would be Width + Length + Width + Length + Scoring Allowance on each panel. The program will check the Panel Minimum and Maximum of all panels except the joint panel.	Feature
E-C EC	20695	SETPRINT=McLean - Set Margin Calculation	Fix was made to the Set Margin Calculation. The components will be have the same board cost and selling price no matter if they are in a set or not.	Defect
E-C EC	20108	Multiple Prep/Route Quantities problem (looking at first qty)	Fix was made so that the Prep/Route looks at all the estimate run quantities when trying to build the routing.	Defect
E-C EC	19964	FOAM Layout Tab must be Fixed before Soule and LovePac Training	Fix was made so that the changing the board with the override button will update the dimension on the Depth popup for Foam.	Defect
E-F EF	20774	Find First/Last error	In Folding Cartons estimating, when adding blank or form, or updating an existing blank or form of an existing estimate, you may have received an error: FIND FIRST/LAST failed for table box-design-line. This has been corrected.	Defect
E-F EF	14152	Machine in Prep/Route Folder not calculating MR Hrs right with 2 passes	Fix was made so that the MR Hours for the machines will look at multiple passes to come up with the correct time.	Defect
E-F EF	19953	Estimate Print Out Square Inches Should Transfer from SPEC Tab	If the user overrode and updated the calculated 'Blank Sq. In' field on the Estimate Spec tab, when the Print tab 'View' report was run the Blank Size Sq Inches would be the previously calculated value, not the overridden value. The report now includes the correct Blank Sq In value as it appears on the Spec tab.	Defect
E-F EF	20807	Copying Estimates not Updating Last Estimate (estimate copied from)	Fix was made to the From Field on the Spec Folder so that it displays the right Estimate it was copied from.	Defect
EC E-C	20426	Inks Pack screen cycling forms	Fix was made to that the Inks/Pack Folder doesn't cycle through the forms	Defect
EC or EF E-C or E-F	20739	Corrugated and Folding SPEC Folder Image Field Problem	On the Spec tab of Estimating (EF or EC) the task bar help has been updated for the 'Image' field to state: Filename of the Die Image'.	Defect
H-V HV	20119	Sales Analysis - Profit by Item (HV): the new Parameters Selection form is causing an issue with calculating the Cost/M	When running the 'Value/Profit by Item' report using the selectable fields and column sequencing format, the Board Cost/M, Order Cost/M and Invoice Cost/M fields were not available to be used on the report. These 3 fields have been added to the Available Columns to be selected for this report.	Defect

Advantzware 16.5.0 Release Notes

Hot Key or Application	Ticket Id	Subject	Resolution	Classifications
I-U-5 IU5	18951	Performance improvements to speed up finish good tags posting	Fix was made to speed the posting of finished good up.	Defect
J-R-8 JR8	20681	N-K Reports = JR8 Logical Value = Yes (Add Invoice Date Column)	Change was made to add the Invoice Date to the JR8 Report. This will print the Invoice Date of the Finished Good if there was one.	Feature
J-U-1 JU1	20654	Add ability to "Print FG Item Image" to Jobcardc1 (and Jobcardf1)	Change was made to the Job Ticket formats of JobCardC 1 and JobCardF 1 to add the function to Print the FG Image.	Feature
J-U-1 JU1	20202	START DATE	Fix was made so that the start date is not automatically put into the start field when you click the View Job Folder.	Problem
J-U-1 JU1	20787	N-K JobCardC = Peachtree (Notes Problem)	Fix was made to their Job Ticket so the Notes don't overlap the new waste box.	Defect
M-R-11 MR11	20815	M-R-11 Must Print Data in Columns	Change was made to the Excel Output so that all the columns print data.	Defect
MR3 M-R-3	20299	Bug in Print Estimating Material Only? M-R-3	Change was made to have a Radio Button on the MR3 to print either Estimated, Real or Both materials. The checkbox for print Estimated Material was removed as well.	Problem
N-R-9 NR9	20675	New Module - QueryBuilder	Query Builder is a tool that allows advanced users to build custom data queries for direct access to Advantzware data. These queries can be saved to be run again in the future. Data can be output to screen or to Excel.	Feature
N-Y-15 NY15	20397	Error message in V Y 15	When updating a Vendor number using the Update Vendor Number program (N-Y-15) you may have received an error: No bf-vend-new-record is available. This issue has been corrected.	Defect
O-B-1 OB1	20813	O-B-1 Print Icon Error on Paperless Setting, Should only search customers in INvoice File	Fix was made so that only the customers in the Invoice Screen will be check to see if they're set to Paperless or not.	Defect
O-B-1 OB1	20502	N-K InvPrint = Peachtree & PeachtreeFGL3 (Posted invoices showing 0 quantities)	Fix was made to their Invoice Formats so that items will not print when both the Invoice and Shipped quantities are 0 on posted invoices.	Problem
O-R-15 OR15	14711	Performance improvements to the Orders Booked (OR5) report	Changes have been made to the 'Freight Report' to reduce the time to compile the data for the report. These changes have resulted in a 20% reduction in compiling time in the internal ASI test environment from 16.4.4 to 16.5.0. Your results may vary but you should notice an improvement.	Question
O-R-16 OR16	20195	O-R-16 - New Selectable Columns missing records - Include Inactive Required to view but not inactive	When running the Open Order Report and checking the option to 'Include Active Items', the logic to determine if the Item is Active or Inactive was not always correct due to how the data was read by the report parameters. This has been corrected.	Defect
O-S-1 OS1	20535	N-K BolFmt = CCC and CCCWPP (2nd page prints red problem)	Fix was made to their BOL Formats so the second page doesn't print red. Also, the counting of the pages was corrected as well.	Defect
O-U-1 OU1 J-U-1 JU1	20516	Esko Integration - Phase 1: Base Job and UDF's	<p>With this release we begin a partnership with Esko to develop a robust integration between Advantzware and the Esko suite of products.</p> <p>This first Phase 1 of the multi-phase project targets generating a base XML file when a job is created that is posted to a hot folder that Esko will monitor. The XML file contains information for Esko to create an order in Automation Engine, including the FG Item and any User Defined Fields (UDF's) linked to the FG Item.</p> <p>See the '<i>Advantzware / Esko Integration Guide - Phase 1</i>' document for more details. Note that to utilize this integration a purchase of the Advantzware/Esko Integration Module is required.</p>	Feature
Schedule Board	13322	New "Job Hold" status should be based on *Job* status not Order status	In Schedule Board, if color of a Job on 'Hold' was determined by the status of the Order. A change has been made that now recognizes the status of the Job in order to set it's proper Hold status color.	Feature
Sharp Shooter	20910	Sharp Shooter printing error	When printing a report in Sharp Shooter you may have received an error stating: ** "bol/promtBol.p" was not found. This has been corrected.	Defect
Sharp Shooter	20769	Sharp Shooter BOL Scanned Qty only looks at 1 FG Item	Fix was made so that The Scanned Header Quantities of the BOL will change to that item if you click on that item's line.	Defect
SS	20767	Error bol\printBol.p not found	Fix was made so you don't get this error when printing a BOL in Sharp Shooter.	Problem
T-F-3 TF3	20294	Touchscreen Data Collection Problem	Fix was made so that you don't get an error when trying to manually add a machine transaction in T-F-3.	Defect
