### **How can I adjust create an incrementing box counter in LABEL MATRIX?**

#### **Problem**

How can I adjust create an incrementing box counter in LABEL MATRIX?

#### **Environment**

Windows XP SP3 Windows Vista Windows 7 Windows 8 Windows Server 2003 Windows Server 2008  
Windows Server 2012

#### **Resolution**

Add a text field to the label and choose Counter as the Origin. In the Start At: box enter 1, or your default starting value (01 if you will have up to 99 boxes, 001 for 999, etc.). In the Sample: box enter also 1. Click on the Advanced... button and change the Count When setting to Duplicates. Click OK and place the field on the label. Add a second text field to the label and choose Constant as the Origin. In the Text box enter the word of. Click OK then place this field on the label to the right of the first field. For a third text field, choose Keyboard Input as the Origin and set the Prompt to "Number of Labels", this is the prompt that will appear at print time. Click on the click OK to place the field on the label next to the first two fields. Click on File>Label Properties select the Duplicates tab and choose Combination as the Origin. Highlight the name of the Keyboard Input created in step 3 and click the Use button. Expression should now read Keyboard 1 (the name of the keyboard input field). Click OK
