16.8.7 Hot Fix Release Notes

Hot Fix Version	Type	Hot Key	Subject	Resolution	Ticket
16.8.74	P-U-3	Defect	POPrint - Standard PO formats - missing 'Grand Total MSF'	A previous release removed the 'Grand Total MSF' value from the 'standard' PO Print formats: POPrint10, POPrint20 and POPrint10-CAN where there were varying material types on a PO and the MSF was not valid. This release add a new 'Print Grand Total MSF' Selection Parameter option which restores the Total MSF values where applicable. Like all Selection Parameters the user will only need to select this once and it will then become a default for each time they print PO's.	46229
16.8.74	SS	Defect	Sharp Shooter Finished Goods POST Programs	In a previous release a change was made to 'sync' the programs launched in the Mode of 'Sharpshooter' and the Main Menu Sharpshooter programs. While this was a positive move it did impact the Finished Goods 'Post' programs, changing them from a simple 'Do you want to post?' type question to the full blown Finished Goods Posting program. This release restores the SS FG Post programs to the simpler interface.	45894 46268 46273
16.8.73	B-F-2 B-F-3	Defect	Sharp Shooter - restore POST button to the SS Finished Goods Transfer program	A change was made in a previous version to synchronize the Sharp Shooter 'mode' programs with the Advantzware 'mode' program. During this transition the Post button was removed from the program. This has been corrected; the Post button has been restored to the program.	37947 46138
16.8.73	N-S-6	Defect	Build Security by Menu - error launching program - ** "?" was not found. (293)	When launching the Build Security by Menu program the user would receive an error ("?" was not found. (293)) and the program would not complete the loading of data. This has been corrected.	46082 45963
16.8.73	O-U-1	Defect	Order Entry Items tab - incorrect Price Hold when Line created from Quote has no FG Item #	When utilizing the Price Hold logic (NK1-OEPriceHold) and one of the Character Values selected is 'QtyQuoted', when a new Order Line Item was created from an Estimate with no FG Item #, the Order was incorrectly placed on 'Price Hold'. This has been corrected.	45500
16.8.73	S-3	Defect	Schedule Board - Ink data is not loading	For jobs that have Ink's defined, the inks were not transferring to the Job in the schedule resulting in report with incomplete data. This has been corrected.	45767 46204 46208
16.8.72	Defect	B-F-1	Sharp Shooter Finished Goods Receive Goods - cannot scan a Whse/Bin barcode	When scanning a Whse/Bin barcode the data (Whse and Bin) are not properly parsed and all data is placed in the Whs field, causing the record to not be processed. This has been corrected; the Whse/Bin data will be properly parsed and placed in their respective fields, allowing the record to be properly processed.	45765
16.8.72	Defect	O-U-1	Order Entry Items tab - the Release and BOL/INV button are not active	A change was made in 16.8.7 to disabled these two buttons in the Order Inquiry program once the Order is closed, but that caused these to be inadvertently disabled in the Order Entry program for Open Orders. This has been corrected.	45770
16.8.71	Defect	E-C	Corrugated Estimating - Scoring Allowances are incorrect or missing	With the release of 16.8.7 a change was made to increase the Corrugated Spec tab Blank Width and Blank Length fields which resulted in an issue with how the Score Allowances are generated. This has been corrected.	45391
