What OneStep ChargeSM Users Say

"We wanted to **add e-payment processing** capabilities to our Progress application, but simply did **not have time** to master that whole arena on top of everything else. OneStep ChargeSM claimed an **ultra-fast and seamless 'Pure Progress' integration**. It was outstanding and **did exactly what we needed it to**. We're up and running."

— Paul Keary, Coe Press Equipment

"We launched a Progress venture and wanted to get **fast e-payment processing directly in Progress**. We needed **flexibility** from Tri-8 and **performance** from OneStep ChargeSM. We got both—an **excellent combination** for us."

— Kevin N.

"We have **years of experience** using Progress and our application is **stable and proven**. We actually had e-payment processing already, but **we wanted a 'Pure Progress' solution** that offered **excellent integration and high performance**. We were tired of all the issues with our **legacy non-Progress** payment software. We turned to OneStep ChargeSM and it was **simply outstanding**. Now our Progress application truly is a cut above."

— Robert L. Felt, Redwing Book Company

"Our agency wanted to integrate **solid payment processing** in the **back office** as well as on our **website**. Our users wanted to be able to **pay online**, and we did not want a big **headache**. We wanted **speed** and extreme **ease of implementation**. We can now say that it's not only our users who have major convenience online—we ourselves do too, thanks to OneStep ChargeSM! We deployed the solution and it **runs like a champion**."

— Dan Mauro, Pueblo County Information Systems

"Why would a Progress shop NOT use OneStep ChargeSM?"

— Paul Keary, Coe Press Equipment

"We'll **save more money** with the new merchant account in the first year alone than we paid for the whole OneStep ChargeSM setup. **I'd buy OneStep ChargeSM 10 times over**, if I had to. The **difference is night and day**."

— Daisy Outdoor Products

"We were in a bind. The system we were using was not functioning as needed and something had to be done—and fast. Tri-8 promised **fast, easy integration and seamless performance**. We received both. I would recommend OneStep ChargeSM without hesitation to anyone who desires a **simple yet robust API**."
