

Advantzware 16.6.4 Release Notes

Classifications	Hot Key or Application	Subject	Resolution	Ticket
Feature	AOA O-R-18	New AOA Shipment Report	The new AOA OR18 Shipping report can display, by period (for up to 5 years) the quantity shipped by item.	22441
Feature	Business Forms	Canadian business forms	<p>A new set of standard business forms have been added to address the requirements of our Canadian customers. Each contains the new BusinessFormLogo logic that allows you to easily change the logo that prints on each form.</p> <p>Quote: quoprint10-CAN Ack: ackhead10-CAN BOL: bolfmt10-CAN PO: poprint10-CAN Invoice: invprint10-CAN</p>	23563
Feature	D-E-1 DE1	Time Range filter has been added to DE1 - Machine Efficiency	The parameters form of the DE1 excel report now has Beginning Time and Ending Time options. The concept is it will allow entry of times to exclude records outside of the "business day" range. For example, the user can enter a Beginning Date of 10/10/2017 and an Ending date of 10/11/2017 and then specify 05:00 as the start time and 04:59 as the end time. This parameter set will return the "business day" of 10/10/2017.	23250
Feature	Global	Main Menu pull down menus removed	As part of an ongoing project to streamline the user interface we have removed the User, Codes and System pull down menu's from the main menu. All programs previously available in these pull down menu's are now available via the Network / System Administrator.	22212
Feature	IU1 I-U-1	Scroll bar added to Finished Goods PO Receipts popup	When entering a receipt and you are presented with the 'Select items for PO XXXXX' popup, a horizontal scroll bar has been added to allow the user to view all data associated with the PO Line.	23561
Feature	N-K-5 NK5	Expanded User Password Restrictions	<p>The User Controls functionality has been enhanced to allow you to set Password Restrictions on your user accounts. The following variable can be defined:</p> <ul style="list-style-type: none"> - Change password after X number of days (up to 999 days) - Minimum password length (maximum of 9999) - Minimum lowercase characters - Minimum upper case characters - Minimum numeric characters - Minimum special characters - Auto Lockout Tries (hard-coded to 4 tries, will be user editable in a future release) <p>Note: this is not a mandatory feature, if you leave ALL values ZERO this new functionality will not be invoked.</p>	20792

Advantzware 16.6.4 Release Notes

Classifications	Hot Key or Application	Subject	Resolution	Ticket

Feature	V-R-4 VR4	Vendor Status option added to Vendor Master List	When running the VR4 report, a new Status option has been added: Active, Inactive or All vendors.	23758
Defect	-	Job Creation Error (J-U-1)	Fix to prevent error message "Job already exists with internal job # 1"	22936
Defect	A-C-1 AC1	Cash Receipts - minor UI corrections	The Check Amount box and the Font box now have correct borders.	24053
Defect	A-F-1 AF1	Context not set for SoldTo Contacts initially	The Sold To contacts are now context sensitive... if a new contact is added they will only show under their defined Sold To address.	23815
Defect	A-F-1 AF1	F1 search when adding Department notes no longer working	When adding a Department level note, the F1 search option was not functioning. This functionality has been restored.	23703
Defect	A-R-11 AR11	AR11 Report - Header data printing twice	The header section of this report was printing twice. This has been corrected.	24041
Defect	A-R-5 AR5	AR Aged Report - Minor formatting cleanup	The '---' line will only print on top of the aging columns when the aging buckets are selected columns.	23985
Defect	E-C E-F EC EF	Error Message when Adding a Prep charge on the Estimating Specs Tab	When entering a Prep Charge on the fly in the Estimating Specs tab, you may have received this error: Cannot access the NAME attribute because the widget does not exist (3140). This has been corrected.	23653
Defect	E-Q EQ	Not all Adders printing on Quote	On the standard quote letters Adders may not have printed (if you had selected to print the 2nd line of the item description) and when they did print, it may not have included all Adders. This has been corrected to print the Adders in addition to all other lines, and it will now print up to 6 Adders added to the estimate.	22648
Defect	Esko Monitor	Esko XML file is not including the FG Category	When exporting an XML for the Esko integration the FG Category description was not included in the XML. This has been corrected.	24049

Advantzware 16.6.4 Release Notes

Classifications	Hot Key or Application	Subject	Resolution	Ticket
Defect	G-Q GQ	GQ Period error	When selecting a period range where the starting value was a single digit (2-9) and the ending value was 10, 11 or 12, you would have received a message that 'Ending period must be same or later period'. This has been corrected, you can now run the report for valid period ranges.	23603
Defect	J-R-14 JR14	Job Est/POI Audit Report missing from Job Cost Reports menu	Depending on how you have defined your menu's, the J-R-14 (Job/Est/PO Audit) and J-R-15 (WIP Tag) reports may not have both been available to a user. This has been corrected for all non-customer menu users.	23836
Defect	J-R-3 JR3	JR3 Report - Est Cost 0 when 2 different board materials are used on job	<p>If you have used the Estimate Layout -> 'Sheet Calc' function to change the materials on an estimate, and added 2 different real board materials were added to replace the estimated material, these two boards are then issued to the job individually. When you then run the JR3 report for the job you would see that the estimated cost shows 0 for one of the boards, which understates the estimated cost on the report.</p> <p>This has been corrected, the two board materials will now report their correct respective values.</p>	23736
Defect	J-U-1 JU1	Error on Paper Allocation	When allocating a material where the total extended cost exceeded one hundred thousand dollars you would have received a error: Value XXXXXXXX.XXXX cannot be displayed using ->, >>9.9999. (74). This has been corrected.	23877
Defect	M-F-1	Export Raw Materials Inventory to Excel error	If the value of a quantity field exceeded 12 digits, you will have received a 'Value too large to fit in integer' error. This has been corrected.	24050
Defect	M-U-6 MU6	Purchase Order email notification - typo	The Purchase Order email notifications contained a typo Purchase was misspelled as Purchse. This has been corrected.	23557
Defect	N-R NR	Admin user restricted from running "N->Run Custom Utility Program"	The ability to launch the 'Run Custom Utility Program' has been modified; an Admin user with a security level of 900 or greater can now launch the program.	23865
Defect	N-S-8 NS8	Add-on menu items added to Program Master	The Add-on menu programs have been added to the Program Master to now allow you to define user level access.	22818
Defect	NU	Cannot search by user	Fix applied to allow search for a user when logged in with admin level privileges	23743
Defect	N-U NU	Error message generated when exporting the User list	When trying to export a User list to excel you would receive a 'no entry point' error. This has been corrected.	24091
Defect	N-U NU	User Password does not allow #	When updating a user password the '#' was not being accepted. This has been corrected.	23922
Defect	O-R-2 OR2	OR2 - Routing column not always properly populated	Previous to this release the Routing column on the Scheduled Releases report the routing field may not have been populated if there was no Job in the order. This has been corrected; if there is no job tied to the order, the estimate tied to the FG item on the Order is used.	21298

Advantzware 16.6.4 Release Notes

Classifications	Hot Key or Application	Subject	Resolution	Ticket
Defect	O-S-1	Field size error when creating a BOL	When creating a BOL you may have received an error noting the Pallets or Units/Pallet values were not valid. This has been corrected, the field sizes have been expanded.	23785
Defect	OS1 or OS3	Remove page number reference on BOL	The BOLFMT 2 and BOLFMT 20 formats no longer include Page X of X.	23515
Defect	O-U-1 OU1	Invoice Only is not allowing for a Release	In O-U-1, when you create a Invoice (I) release, the 'Release' button may have been inactive (greyed out). This has been corrected.	22911
Defect	O-U-1 OU1	Order Entry Matrix does not reference correct customer table	When selecting the Matrix tab in Order Entry, the resulting grid did not always filter records to the specific customer on the order. This has been corrected.	23834
Defect	P-U-1	Notes indicator on PO not always correct	When Notes have been added to a Purchase Order the 'star' indicator that let's the user know that Noes exist was not always correct. This has been corrected; the toolbar Note icon is now in the proper context and displays the indicator when Notes exist.	23581
Defect	P-U-1 PU1	Start Due Date Filter in PU1 leads to POs that seem to disappear after you add header (and can't add line)	In PU1, on the Browse PO tab, if you set a Start Due Date of say 11/01/2017 and execute the search, and then try to enter a new PO with a due date of 10/23/2017, the PO would seem to disappear after you add header (and can't add line) as the search parameters were still being applied. This has been corrected to reset the Start Due Date.	23606
Defect	P-U-1 PU1	Incorrect PO Cost imported from Farm Tab Cost table	When entering a line item on a PO, the 'Import Cost' function was pulling data from the estimate linked to the FG Item. This has been corrected to always pull the cost from the FG Item Vendor Cost tab, not the Estimate Farm tab.	23592
Defect	S-3 S3	Invalid Schedule Board access message	If you set NK1 SCHEDULE logical to NO, when you tried to launch the Schedule Board you would have received a error with a '?'. This has been correct, you will now receive a properly formatted message: Scheduler View Not Enabled - Please Refer to System Administrator.	24034
Defect	S-3 S3	Job Note in SB may have shown notes from previous jobs	A correction was made to how Schedule Board references job notes to now only show notes for the specific job.	24056
Defect	S-B SB	SB Documentation does not launch with Help Icon clicked	When selecting the Help '?' the Scheduled Board documentation will now properly launch.	24009
Defect	S-B SB	Schedule Board Notes disappearing	Due to a data issue notes entered in the schedule board may have disappeared, but in fact they were still there just not properly referenced and not displayed. This has been corrected.	23939

Advantzware
16.6.4 Release Notes

Classifications	Hot Key or Application	Subject	Resolution	Ticket
Defect	S-B-3 SB3	Schedule Board will error and not load with incompatible versions	When launching schedule board and version is not as expected, you may have received a 'getv2010' was not found error. This error has been corrected and replaced with a proper message: Schedule Board Configuration Release vX.XXX is outdated. Auto Correct to Release vX.XXX? (Note: x's will be replaced with actual version numbers)	23526
Defect	T-D TD	Touch Screen Time Entry - AM/PM error	You may have received an error when entering a time transaction that spanned midnight as the AW/PM time trigger was not always properly referenced. This has been corrected.	23876
