16.0.2 Release Notes :

Ticket Id	Subject	Resolution	Classifications	Hot Key or Application
13022	New N-K-1 parameter called POScreen with the Character Values of Job-Item and Item-Job.	Character Value = Job-Item. The cursor moves starts in the Job# field then moves to Job# 2. Then the cursor movers to the item where you can hit F1 and the materials for that job are displayed. Then the cursor moves to the due date. Example you put Job 999999 in you click F1 on the items and the raw materials for that Job will only be listed. Character Value = Item-Job (or blank) will be the existing logic for the cursor movement. Cursor will move from Item then to Job then Due Dute then name	Feature	N-K-1 NK1
14946	When adding a new raw material adding a note to the book button was adding the note to the first item on the item list.	The note is now adding to the right raw material.	Defect	M-F-1 MF1 M-F-2 MF2
14966	When N-K-1 parameter Reports character value for the Orders Booked Report (OR5) logical value is set to Yes, Add a column called PO# to report.	You can now select the PO# to print out on the report and this will be customer PO# at the order line level (OU1 Items tab).	Feature	O-R-5 OR5
15330	Cannot email from Advantzware after new Advantzware patch.	The emailing service is now working again.	Defect	-
15309	The N-K-1 parameter CusotmerList for the all the I-R and I-L Reports were not functioning properly when the Integer Value was set to 0.	All the Inventory Reports now function correctly when the CustomerList parameter has an Integer Value set to 0.	Defect	I-R IR I-L IL
15315	Issue with Vorne to ASI posting	Quantities on jobs that were started and restarted the next day are now handled properly within the Vorne DMI integration module	Defect	-
15436	Printing Loadtags Problem - Unhandled " in Ship Notes	When a ship note or spec note contained a " (quote) the loadtag printing process was not handling properly and additional copies of loadtags were not printing. These quote characters will now be stripped out of the notes fields so that the loadtag (and the rest of the note) print correctly.	Defect	-
15474	When adding an Order with an Estimate # on the Items Tab the cursor movement wasn't working correctly.	The cursor movement now flows correctly when adding an Item by the Estimate Numer on a new Order.	Defect	O-U-1 OU1
15544	When N-K-1 parameter Reports has the character value for the PO Purchase Variance Report (PR5) and the logical value is set to Yes add a filter by Receipt Date	The report will not have a search parameter called Beginning Rec Date and Ending Rec Date. Everything with in those Receipt Dates with print on the report. Also there is now a Column Called Rec Date that will print the Receipt Date of that item.	Feature	P-R-5 PR5
15568	New FG Item Lookup within Estimating on the FG Item # field when adding an estimate.	The F1 look up on the FG Item # field will include Finished Goods that are not on any Estimates as well as the Finished Goods with an Estimate #.	Feature	E-F EF E-C EC
15599	Quote dates in Order Entry Sell Price pop up were wrong.	The Quote Dates in the Sell Price pop up now show the correct dates for that quote.	Defect	O-U-1 OU1
15700	When N-K-1 parameter Reports has the character value for the Job Material / Machine Report (M-R-14) and the logical value is set to Yes add a cloumn Item Name and update the Description column.	The Item Name column will print the Item Name from the Raw Material File The Description column will now print the Desc Field from the Raw Material File.	Defect	M-R-14 MR14
15686	When the N-K-1 parameter AckHead has a Character Value of 3CPack the Order Acknowledgements were printing the same scheduled release date for all the shipments.	The right date now prints for all the scheduled releases.	Defect	O-U-4 OU4
15656	When N-K-1 parameter Reports has the character value for the Value/Cost by Whs/Bin/Tag Report (IR2) and the logical value is set to Yes the Days Old Column is printing what is on the column to the left.	The Days Old Column is now printing the number of days it is old.	Defect	I-R-2 IR2
15701	When the N-K-1 parameter POPrint has a Character Value of CCC the PO was missing notes. Only the 1st note is printing.	The PO Format CCC now prints all the notes one after another.	Defect	P-U-1 PU1
