## Mobile Computers

### Easily capture real-time data and deliver on-the-go productivity with Symbol's mobile computers

Capture and exchange data according to your specific business demands with the versatility of Symbol's mobile computing products. From rugged industrial class devices able to stand up to tough conditions to enterprise digital assistants used by managers to shopping systems used by consumers, Symbol mobile computers increase individual productivity and give you ongoing, real-time insights into your operations. Symbol's reputation for quality, reliability and choice has made Symbol mobile computers the foundation for enterprise mobility for businesses worldwide.

With Symbol mobile computers you'll track inventory more efficiently and accurately, manage assembly line production more effectively, improve shipment accuracy and speed product returns — even in harsh, dirty or extreme environments. Our mobile computers, together with our bar code scanners, radio frequency identification (RFID) solutions, wireless infrastructure, industry-leading partner applications and management software products, provide the foundation you need to become an organization on the move. Because all parts of the solution work together — and with your other networks and information systems — you are able to cost-effectively build and adapt your mobile enterprise as your business grows and changes.

### Industrial Class

Gain greater visibility into your operations with superior data collection under demanding conditions using rugged mobile computers.

### Portable Shopping System

To retain customers and increase sales in retail environments, you must make the shopping experience a positive one — an experience that values the customer's time, gives them relevant information to make buying decisions and streamlines the checkout process.
