## 16.0.0 Release Notes :

| Ticket Id | Subject | Resolution | Classifications | Application |
|---|---|---|---|---|
| 12826 | Auto-Issuing materials with negative on-hand qty is incomplete | Defect in which the quantities of raw materials will be auto-issued with only a fraction of the quantity required (the first FG receipt for that job). This occurred when the real stocked raw material had a negative on-hand quantity.<br><br>A change was made to always auto issue a complete MRP quantity if the RM Item is flagged as "Zero Quantity" | Defect | IU5 |
| 12833 | Start Date in Purchase Orders to save the date by User Id | Start Date on the Purchase Order Browser now defaults to the last date you typed in that field. | Feature | PU1 |
| 12847 | New Toggle Box to be able to Email Push Pin Attachments on Order Acknowledgements | You can select the toggle box "Email Push Pin Attachments." You can select the actual attachments you want to email in a box to the right of that.<br>Those attachments will be attached to the email. | Feature | OU4 |
| 12868 | New column to the I-L-6 Report for the Ship To Code | When N-K-1 parameter Reports is set to Yes on the Logical Value on the View Form Folder you can add the Ship To # and the Ship To Name to the report. | Defect | IL6 |
| 13505 | New Email Notifications to automatically send emails to the Sold To Contacts | In the Customer File (A-F-1) on the Sold To Folder you can click the phone book button and add Sold To contacts so you can send them emails automatically.  Just make sure after you add them in the Phone Book button they are in the Ecodes as well.  They are located in the title menu bar under Codes then Email Codes. | Feature | AF1 |
| 12996 | Finished Goods File - Inventory Folder- Job/PO On Order Button - Paid Checked | Go to the Inventory Folder.  Click the Job/PO On Order Button. The Job Variance Inquiry pops up. Close it.  The PO Inquiry pops up. The paid check box is now checked off by default when this pops up. | Problem | IF1 |
| 13130 | New Settings for SharpShooter Create BOL:  N-K SSBOLPRINT CharValue = "OverShipWarning" plus others | In SharpShooter, Create BOL, new option for a warning message for the user indicating that the scan quantity doesn't match the release quantity was added.<br><br>The N-K-1 setting is SSBOLPRINT.<br>If the Character Value = Blank or "NoWarning" then no warnings will be presented<br>If the Character Value = "OverShipWarning" then when the release quantity is greater than the scanned qty you will get and warning.<br>If the Character Value = "UnderShipWarning" then when the release quantity is less than the scanned qty you will get and warning.<br>If the Character Value = "OverUnderShipWarning" then when the release quantity is less than and greater than the scanned qty you will get and warning. | Feature | SS |
| 13131 | Sharp Shooter BOL Transactions to change color of the scanned quantity | If the scanned quantity doesn't equal the release quantity the scanned quantity field will be red.<br>If the scanned quantity does equal the release quantity the scanned quantity field will be green. | Feature | SS |
| 13135 | Ship-Only BOL Shipment Transactions incorrect | Defect:  After processing a ship-only transaction for inventory that was previously transferred, the resulting FG bins were incorrect.  This could be resolved with a recalculation.<br>The fix was to automatically correct the FG Bins so as not to require a recalculation | Defect | OU1 |
| 13156 | Add Customer Part # to the Physical Count Report (I-C-1) | Added Customer Part# as an available column on the I-C-1 report.<br>This only happens when the N-K-1 parameter Reports Logical Value  on the View Form Folder is set to Yes for the Character Value IC1. | Feature | IC1 |
| 13169 | Skipping Sequence Error was causing Raw Material issues to not get Created and Posted | Internal Error was fixed so this doesn't happen. | Defect | MU6 |
| 13182 | Required Date on PO wasn't adding Lead Time Days from Vendor File to the Date | When adding a PO the PO Date + The Vendor Lead Time Days in VU1 equals the Required Date. | Defect | PU1 |
| 13213 | Copy in IU3 results in 00:00 time | Defect:  Doing a copy would result in a transaction that had 0:00 time stamp, where it should show the time of the copy.<br>This was fixed to show the actual time the user did the copy. | Defect | IU3 |

| Ticket Id | Subject | Resolution | Classifications | Application |
|-----------|---------|------------|-----------------|-------------|
| 13346 | New parameter called CustomerList which allows you to limit a user to only see certain customer in JQ1. | On the View Form of the N-K-1 parameter you can limit users to only see their customers when logical value is set to Yes.<br><br>Integer Value = 1 will Secure Program by User List and Customers on NK1 Customerlist.<br>Integer Value = 1 will Not Allow Changing the Toggle Box "User Defined Customer List"<br>Integer Value = 0 will allow Modification to Toggle Box " User Defined Customer List"<br>Integer Value = 0 will show Customer Range & F1 on Customer Code will show all Customers<br><br>Only Users listed on the N-U Customers Tab will be reported.<br>Plus Customers Defined on N-K-1 CustomerList View Form Tab. | Feature | JQ1 |
| 13383 | New parameter called CustomerList which allows you to limit a user to only see certain customer in EQ. | On the View Form of the N-K-1 parameter you can limit users to only see their customers when logical value is set to Yes.<br><br>Integer Value = 1 will Secure Program by User List and Customers on NK1 Customerlist.<br>Integer Value = 1 will Not Allow Changing the Toggle Box "User Defined Customer List"<br>Integer Value = 0 will allow Modification to Toggle Box " User Defined Customer List"<br>Integer Value = 0 will show Customer Range & F1 on Customer Code will show all Customers<br><br>Only Users listed on the N-U Customers Tab will be reported.<br>Plus Customers Defined on N-K-1 CustomerList View Form Tab. | Feature | EQ |
| 13386 | After an Invoice Only was posted then the Ship-Only BOL Transactions were making the Quantities incorrect in the Bins | Fixed this internal Problem.  The quantities are now taking out of the right Tag#s and the right bins. | Defect | OU1 |
| 13392 | Created Loadtag for Assembled Set with Part Receipts, Set Header in OU1 and IU1 has a PO# but | The Loadtag for the Set Header for an Assembled Set with Part Receipts only has a Job# now. | Defect | IU1 |
| 13395 | The paperclip attachments with a file extension of .msg won't launch Outlook anymore | This file extension now launches Outlook when you run this file type. | Defect | SYS |
| 13399 | The tag numbers are not in order when the N-K-1 parameter RelPrint has a character value set to | The tag numbers for Lakeside's Release format are now in order. | Problem | OT3 |
| 13403 | When the OE Invoice Edit List (O-B-2) was exported to excel the columns were not lined up | Everything is under the right column now. | Problem | OB2 |
| 13406 | Could not add a new corrugated estimate when the CustomerList (EC) parameter had an integer value of 1 and logical value set to | The parameter now works the way it should and you can add a new estimate. | Problem | EC |
| 13425 | Pending Jobs Report in Schedule Board has the MSF value is for Set Header and Not Component | MSF value is for the set component now. | Problem | SB |
| 13431 | WIP Standards Item Audit List Report (D-R-14) to sort by Machine, Job, or Date/Time and to add a coulmn called Total Job Run Qty. | When the N-K-1 Parameter Reports Character Value DR14 Logical Value is set to Yes you can sort by Machine, Job#, or Date and Time and a new column called Tot Job Run Qty.  Tot Job Run Qty will display the Total Job Quantity for that job. | Feature | DR14 |
| 13434 | The Loadtag Button for Purchased Items Problem in Order Processing was not bring in the right item | The loadtag button is now bringing in the item that is highlighted on the Items Folder in O-U-1. | Problem | OU1 |

| Ticket Id | Subject | Resolution | Classifications | Application |
|---|---|---|---|---|
| 13451 | N-K-1 parameter CustomerList for AR4 set to Yes and the user list for customers was blank the parameter wasn't working. | The parameter now works are it should.<br>On the View Form of the N-K-1 parameter you can limit users to only see their customers when logical value is set to Yes.<br><br>Integer Value = 1 will Secure Program by User List and Customers on NK1 Customerlist.<br>Integer Value = 1 will Not Allow Changing the Toggle Box "User Defined Customer List"<br>Integer Value = 0 will allow Modification to Toggle Box " User Defined Customer List"<br>Integer Value = 0 will show Customer Range & F1 on Customer Code will show all Customers<br><br>Only Users listed on the N-U Customers Tab will be reported.<br>Plus Customers Defined on N-K-1 CustomerList View Form Tab. | Problem | AR4 |
| 13460 | Add Output to Excel check boxes to Board/Paper To Order Report (P-R-13). | Added the check boxes Export to Excel and Auto Run Excel P-R-13 Report.<br>This will automatically the report in Excel if they are both checked off. | Defect | PR13 |
| 13466 | 2 Piece Boxes are being changed to from assembled to unassembled. | This is no longer happening. | Defect | OU1 |
| 13468 | When N-K-1 parameter Reports character value for ER5's logical value was set to Yes Non Booked orders wouldn't show when the Order Date was on the Report. | When the order date is on the report the report the unbooked estimates now show their data.<br>The Order date is just Blank. | Problem | ER5 |
| 14490 | The Aged Inventory Report (I-R-12) wouldn't show the Value of the FG items when the Print Quantity radio button was selected. | The radio button for Print Quantity and Value on the parameters screen is no longer there when the N-K-1 Parameter Reports Character Value IR12 Logical Value is set to Yes. Both the Quantity and Value will print. | Feature | IR12 |
| 14491 | No F1 lookup for the Charge Codes in Touchscreen under Machine Transactions | There is now a F1 Lookup for the Charge Codes so you can see what they are. | Problem | TS |
| 14505 | New Farm Out Button when adding an estimate. | When adding a new estimate you can select the Farm Out Button and it will default the estimate to Purchased (P) under the Purchase/Manufacture Column. | Problem | E |
| 14495 | F1 Lookup on the Cust# field in the Custome File is not working correctly. It is not pre-selecting what you typed in already. | F1 lookup on Customer# field now preselect matches for characters already entered in the search field. Example: Type ZOV. Hit F1. It will show customers starting with ZOV first in the lookup. | Defect | AF1 |
| 14555 | When the N-K-1 parameter Reports was set to Yes for PR8 the Due Date had an Invalid format. | The format has the correct format of MM/DD/YY now. | Problem | PR8 |
| 14650 | When creating a BOL in Sharpshooter for stock items you could not ship over the overrun of | Shipping more than the overrun is now allowed. | Defect | BOL |
| 14700 | Qtys in IF1 Incorrect - Refactor to calculate fields vs. display DB field value. | Fix so that the quantities in I-F-1 for Allocated will be a calculated value, representing the open order balance (order quantity minus shipped quantity). | Defect | IF1 |
| 14707 | Single Item PO will auto open in Sharp Shooter for Receiving Raw | - | Feature | - |
| 14784 | Excel Exports has leading space on Time values on all Touchscreen Reports and Excel does not convert to time format | Corrected this problem so the time is converted correctly. | Problem | TS |
| 14858 | When exporting the FG Posting Report By Date (I-L-6) to excel they whole Job# was not being | When the report is exported to excel the Job# is shown including the -00 numbers. | Defect | IL6 |
| 14928 | Crew Size on the Machines only allowed one digit sizes on the Prep/Route Folder | You can now enter in a crew size of say 12 for any machine. | Feature | EC |
| 14970 | When adding an order with multiple sell prices the Sell Price Pop Up could not handle 9 digits | The Sell Price pop up can now handle bigger sell prices. Example 240,000.00/M | Defect | OU1 |
| 14980 | Error Message when adding a new form to the estimate when you are in the Order and click the Estimate | You can now add an item to the estimate when you are in the order without getting the error. | Problem | OU1 |
| 15001 | Pounds can not be calculated correctly in the Orders Booked by Order No Report (O-R-11) | Pounds Unit of Measure will be treated like an Each Unit of Measure in the O-R-11 report. | Problem | - |
| 15079 | Release Button was Greyed out on Release Folder after adding a new release | Fixed this problem and the Release button will not be grayed out. | Problem | OU1 |
| 15026 | Security for N-K-3 (utlookmn.) in the program master is not working properly. | Fixed the security so if the user doesn't have view rights, they cannot launch the app.<br>Additionally, if the user doesn't have Add,Update,Delete rights, the corresponding buttons will be disabled on the View tab panel. | Feature | NK3 |

## 16.0.0 Release Notes :

| Ticket Id | Subject | Resolution | Classifications | Application |
|---|---|---|---|---|
| 15049 | Error message when going into Enter/Edit CR/DB memos (A-W-1) if there wasn't any on the screen | Fixed this so the error message isn't displayed. | Problem | AW1 |
| 15096 | When N-K-1 parameter CustomerList for IR2 is set to Yes the Tag# does not print non- | The Tag# now prints correctly for all tag formats. | Problem | IR2 |
| 15109 | New Columns called Factory Cost/M and Total Factory Cost to the Inventory Status by Job Report (I-L-8). | Added new columns to the IL8 report called Factory Cost/M and Total Factory Cost. Factory Cost/M will print the sum of Material + D.L. + Var OH + Fixed OH columns of JU1 (View Job Folder) for that one item. Total Factory Cost will calculate the based on the Factory Cost/M x the Job Qty/1000 for that item on the job. | Feature | IL8 |
| 15129 | Aged Receivables Report (A-R-5) showing notes if you search passed dates when it should't | Report doesn't show the notes anymore if you search past dates. | Defect | AR5 |
| 15153 | Projected cash balance number doesn't update after when deleting invoices from the Vendor payment selection screen. | The Projected cash balance is now updated after you delete an invoice. | Problem | VB1 |
| 15151 | When N-K-1 parameter Reports character value for the FG Posting Report By Date (IL6) logical value is set to Yes, Add a column called Order # and extend logic of Promise Date and Order Due Date for shipments. | ORDER # - This will display the order number that corresponds to the transaction using the following logic:  If the transaction has a job #, find the order number from the Job #.  IF the Job does not have an order number and the transaction is a shipment, get the order number from the BOL# linked to the shipment transaction.<br><br>Additionally, ensure the existing Promise Date and Order Due Date columns use the logic above to locate the order # from which to pull these order line dates (every transaction line that displays an order # should display these dates) | Feature | IL6 |
| 15196 | EDI Not working for transmission FTP. | EDI transmissions were failing due to a failure in a third party program.  This issue has been resolved so that PO transmissions can successfully be completed. | Defect | - |
| 15217 | New Report called Invoice Highlights Dashboard (H-M-6). | New H-M-6 Report using new Dashboard technology | Feature | HM6 |
| 15219 | Batch Emailing in OB3 is only sending one email then stopping. | The Batch Emailing now sends all the emails it is suppose to. | Defect | OB3 |
| 15263 | Sales vs. Budget Report (H-S) could not be used.  After being click a message popped up saying to contact ASI. | Security check has been removed on this report such that it can be used without special activation. | Defect | HS |
| 15311 | The N-K-1 parameter CusotmerList for the I-L-3 Report was not functioning properly. | This Report now functions correctly when the CustomerList parameter is set to Yes. | Defect | IL3 |
| 15382 | When a different user updates a journal entry created by a different user a warning message said this journal was created by that user. | This unnecessary message has been removed | Defect | GU1 |
| 15397 | New Advantzware Desktop Icon. | New icon for advantzware. | Feature | - |
| 15491 | When the integer value is 1 and Logical value was set to yes for the CustomerList (OU1) parameter all the customer are showing on the F1 lookup on the Bill To when | Corrected this defect so the CustomerList parameter works correctly. | Defect | OU1 |
| 15501 | Error message when running Sales vs Budget report (H-S). | Error message was fixed. | Defect | HS |
| **Total records in this page :109 Records** | | | | |
